

Data Sharing Statement

Article Info	http://dx.doi.org/10.21037/tgh-20-51	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The outcome data in particular will be shared, and the results we found in the two groups (azithromycin and erythromycin), with a focus on visualization during endoscopy done for upper GI bleeding.
4	Any other documents will be share? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Study protocol, analysis, and presented abstracts in the national meeting will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique or survival date may be updated over time.
7	To whom will you share the data?	Gastroenterologist and pharmacists interested in the use of Azithromycin for GI bleeding
8	For what type of analysis or purpose?	For analysis to further evaluate Azithromycin vs Erythromycin in a randomized clinical trial.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: Dani87-md@hotmail.com George.smallfield@vcuhealth.org

10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
